SUMMARY

I have a strong grip and hands-on expertise in Web/APIs, mobile apps, and custom software development using the latest technologies including

Elixir, Phoenix, Python, Django, Fastapi, Flask, ReactJs, React Native, NodeJs, and different DBMS(MySQL, PostgreSQL, MongoDB), etc. I have worked on

different projects for industries including Gaming, Real Estate, Chat Bots, Media Agencies, E-commerce, Textile, Medical, Government, Education, professional services, etc. I am a dynamic and creative professional with over 5 plus years of experience in producing robust codes for high-volume businesses. An experienced software engineer with a passion develops innovative programs that expedite the efficiency and effectiveness of organizational success. A skilled leader who has the proven ability to motivate, educate, and manage a team of professionals to build software programs and effectively track changes. Confident communicator, strategic thinker, and innovative creator to develop software that is customized to meet a company's organizational needs, highlight its core competencies, and further its success. Along with his programming capabilities, he has a very strong knowledge of Software engineering.

I have worked with multiple multinational companies as a Senior and Lead developer & co-founder with 5+ years of experience working with full-stack technologies, Android & iOS (Native + Hybrid), database and back-end systems architecture & development, and AI & ML.

I have experience in managing complex, multi-national projects, and hands-on development as well.
Thanks
